

FOR IMMEDIATE RELEASE

Sinc Constructors Co. and Spectrum Landscaping Services Announce Merger

Two industry leaders unite to deliver comprehensive construction and landscape solutions

Centerville, UT – April 1, 2025 — Sinc Constructors Co. and Spectrum Landscaping Services are pleased to announce a merger that will unite two respected names in the landscape construction and maintenance industries. This merger reflects a shared commitment to innovation, service excellence, and sustainable growth, and will position the combined company as a leader in delivering integrated, end-to-end solutions across commercial projects.

The merger brings together Sinc's expertise in large-scale commercial landscape construction with Spectrum Landscape Services' award-winning capabilities in landscape maintenance and improvements. Together, the companies will provide clients with a seamless, end-to-end experience, a broader range of services, and the strength of a highly skilled, unified team.

"This merger represents a powerful alignment of values, talent, and vision," said Mike Sowby, CEO of Sinc, "Together, we're building more than structures and landscapes—we're building stronger communities and a more sustainable future."

"Our clients have always been at the heart of everything we do at Spectrum, and this merger with Sinc Constructors Co. allows us to serve them even better," explained Kris Ashby, Owner of Spectrum Landscaping Services. "By integrating our services, we're creating a seamless, single point of contact for all their landscape needs, ensuring clear communication, efficient execution, and ultimately, greater satisfaction. It's been a pleasure collaborating with Mike and the dedicated team at Sinc, and I'm confident this partnership will be a significant win for our clients."

The combined entity will continue to honor all existing contracts, maintain client relationships, and uphold the high standards both companies are known for. With a strengthened foundation and a forward-thinking approach, the new organization is poised for long-term success and innovation.
